Comparison with group of competitors

Iceland's group of competitors is defined as high-income countries located in Europe (incl Cyprus). It comprises a group of 26 economies. Figure 2 plots how Iceland fares against each competitor in terms of GTCI score and GDP per capita.

As can be seen, Iceland's GTCI score and GDP per capita are both greater than the corresponding medians of its group of competitors. Thus, the country's talent competitiveness is in line with what would be expected given its income level.
